DETAILED ACTION

1. Claims 1-3, 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, the "cassette" is not connected to remaining limitations, and thus the "apparatus" (line 1) is really an aggregation of parts. Also, is there any particularly limiting meaning to be attributed to the word "cassette" imply? Does it mean any filter holder or a container?

As to claim 7, what does "tailored" mean? Does it simply mean that the portal can be viewed with any microscope?

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-7 and 9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Basch et al.

Basch et al teach an apparatus, including: body 30 with inlet and outlet ports, filter 90, and plate 92 and/or 86 having a portal.

Art Unit: 2856

As to claim 1, elements 92 and/or 86 are flat like a plate, and is removable for purposes of replacing the filter. Also, the plate restricts flow through.

As to claim 3, portion 92 localizes the area to be utilized.

As to claim 4, the plate is/are in the body.

As to claims 5, 6, note that the plate 92 and /or 86 include/s ports at both the upper and lower surfaces or each/both of the plates.

As to claim 7, the size of Basch's sampler is such that it may be viewed by a microscope. Thus, it is "tailored" for such.

As to claim 9, element 92 is flat like a plate, and is positioned in an anterior fashion to the filter. Also, the plate restricts flow through.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vandrish's filter 12 adjacent a restriction plate 10 or 14.

Kaczmarek et al teach a sampler with fluid inlet and outlet in Figure 2A.

Smith teach rectangular slide 35 usage.
